

### Critical Questions:

- Are there any problems with the current system that you want us to fix?
- Are there any specific features or tasks you'd like us to focus on first?
- Are there any specific problems or challenges with the current system that you'd like us to solve?
- How often would you prefer to meet with the team for updates and feedback?
- Are there any specific charts, graphs, or tools you'd like us to add or improve?
- Are there any specific accessibility standards or guidelines we should follow?
- What kinds of data will be represented visually?
- Is there a specific look or color palette you want to use for the visualizations?
- Is there an established database or will one need to be made?
- Are there any specific user roles or permissions that we need?
- What is your ideal timeline for this project?
- How do people currently interact with your system?
